Document templates

When configuring settings for publishing a model to Cameo Collaborator, you must choose a template to determine the appearance and content of a published model. There are two types of templates you can use:

- Predefined templates, which are stored the modelLibraries folder in the installation directory of your modeling tool and appear on the list of the C ameo Collaborator Publisher dialog. Be aware that the list of available templates depends on your modeling tool, e. g., MagicDraw (with or without plugins), Cameo Systems Modeler, etc.
- Custom templates, which are .mdzip files created or modified by a user and stored in the user defined location. These templates appear on the list of the Cameo Collaborator Publisher dialog, if they are stored or used in the project you are going to publish. Learn how to create a custom Cameo Collaborator template.

The following table briefly describes all predefined templates and lists No Magic's modeling tools where each of them is available.

Template name	Short description	Available in
BPMN	Apply this template to publish a model as the process portal, which provides the following views of the model: Processes Data Objects Organization Structures Information Systems	 MagicDraw + Cameo Business Modeler Plugin Cameo Enterprise Architecture
Entire Model	Apply this template to publish a model as the portal, which provides a single view of the entire model.	 MagicDraw (with or without plugins) Cameo Systems Modeler Cameo Enterprise Architecture
Diagrams	Apply this template to publish a model as the portal providing the diagrams view of the model.	 MagicDraw (with or without plugins) Cameo Systems Modeler Cameo Enterprise Architecture
Requirements Document	Apply this template to publish a project as a single-view Requirements Report portal.	 MagicDraw + Cameo Requirements Modeler Plugin MagicDraw + SysML Plugin MagicDraw + UPDM 2 Plugin Cameo Systems Modeler Cameo Enterprise Architecture
Requirements	Apply this template to publish a project as the Requirements portal, which provides the following views of the model: Glossary Requirements Architecture Test Cases Test Cases Traceability Diagrams	 MagicDraw + Cameo Requirements Modeler Plugin MagicDraw + SysML Plugin MagicDraw + UPDM 2 Plugin Cameo Systems Modeler Cameo Enterprise Architecture
Software Engineering	Apply this template to publish a project as the Software Engineering portal, which provides the following views of the model: • Glossary • Requirements • Architecture • Implementation • Test Cases • Architecture Traceability • Test Cases Traceability • Diagrams	 MagicDraw (with or without plugins) Cameo Systems Modeler Cameo Enterprise Architecture

SysML	Apply this template to publish a project as the SysML portal, which provides the following views of the model: Requirements Structure Interfaces Constraints Behavior Diagrams	 MagicDraw + SysML Plugin MagicDraw + UPDM 2 Plugin Cameo Systems Modeler Cameo Enterprise Architecture
UAF	 Diagrams Apply this template to publish a project as the Enterprise Architecture portal, which provides the following views of the model: Security View Resources View - Resources Systems View - Resources Physical Resources View - Resources Resources View - Resource Exchanges Systems View - Resource Exchanges Systems View - Resource Exchanges Systems View - Resource Exchanges Resources View - Functions Systems View - Functions Systems View - Functions Service Oriented View - Service Interfaces Service Oriented View - Service Specifications Service View - Service Interfaces Service View - Service Interfaces Service Oriented View - Service Functions Services View - Service Specifications Services View - Service Functions Programme View - Projects Project View - Projects Personnel View - Organisational Relationships Logical View - Organisational Relationships Logical View - Operational Exchanges Operational View - Operational Activities Operational View - Operational Activities Operational View - Operational Activities Operational View - Operational Performers Strategic View - Enterprise Phases Concepts View - Capabilities Diagramms 	MagicDraw + UAF Plugin
	 Data and Information Dictionary Technical Standards 	

UPDM	 Apply this template to publish a project as the Enterprise Architecture portal, which provides the following views of the model: Capability View - Enterprise Phases Capability View - Capabilities Operational View - Nodes Operational View - Operational Activities Operational View - Operational Exchanges Operational View - Organizational Relationships Systems View - Resources Systems View - Resource Interactions Services View - Service Interfaces Services View - Service Interfaces Services View - Service Interfaces Services View - Service Functions 	 MagicDraw + UPDM 2 Plugin Cameo Enterprise Architecture
	 Services View - Service Interfaces Services View - Interfaces
