

Working with categories

On this page

- [Creating categories](#)
- [Renaming categories](#)
- [Removing categories](#)

All Teamwork Cloud and Cameo Collaborator for Teamwork Cloud resources are sorted by categories. The sections below explain how to create new categories and manage the existing ones.

 After creating/editing/removing category, the category in the other applications will not be updated immediately.

Creating categories

You can create a category either when publishing a model from a modeling tool, or right in the Resources app. Follow the steps below, to create a category in the Resources app.

To create a category

1. [Open Resources](#) and click  on the bottom right corner of the screen. The **Create category** dialog opens.

The dialog box titled "Create category" has a text input field labeled "Category name" with a red asterisk. The text "John's documents" is entered in the field. At the bottom right, there are two buttons: "CANCEL" and "CREATE". A hand cursor icon is pointing at the "CREATE" button.

2. Enter the new category name in the **Category name** field.
3. Click the **Create** button.

The category is created and shown in the repository together with other categories.

Renaming categories

If needed, rename existing categories as described below.

To rename a category

1. [Open Resources](#) and click  next to the category you want to rename.
2. From the menu select **Rename category**. The **Rename category** dialog opens.

Rename category

Category name *

Old docs

CANCEL

RENAME

3. Enter a new category name in the **Category name** field.
4. Click to **Rename** button.

After completing the above steps, you can see the category with a new name in the repository.

Removing categories

You can remove categories without deleting the resources they contain.

To remove a category

1. [Open resources](#) and click  next to the category you want to remove.
2. From the menu select **Remove category**.
3. When you get the message asking if you want to remove the category, click **Remove**.

The category is removed and all the resources it contained are moved to the *Uncategorized* category.
