Editing element values

On this page

- Reordering the values of multi-value properties

If you need to provide feedback on a model or address reviewer's comments, edit certain element values right in the Cameo Collaborator for Teamwork Cloud document.

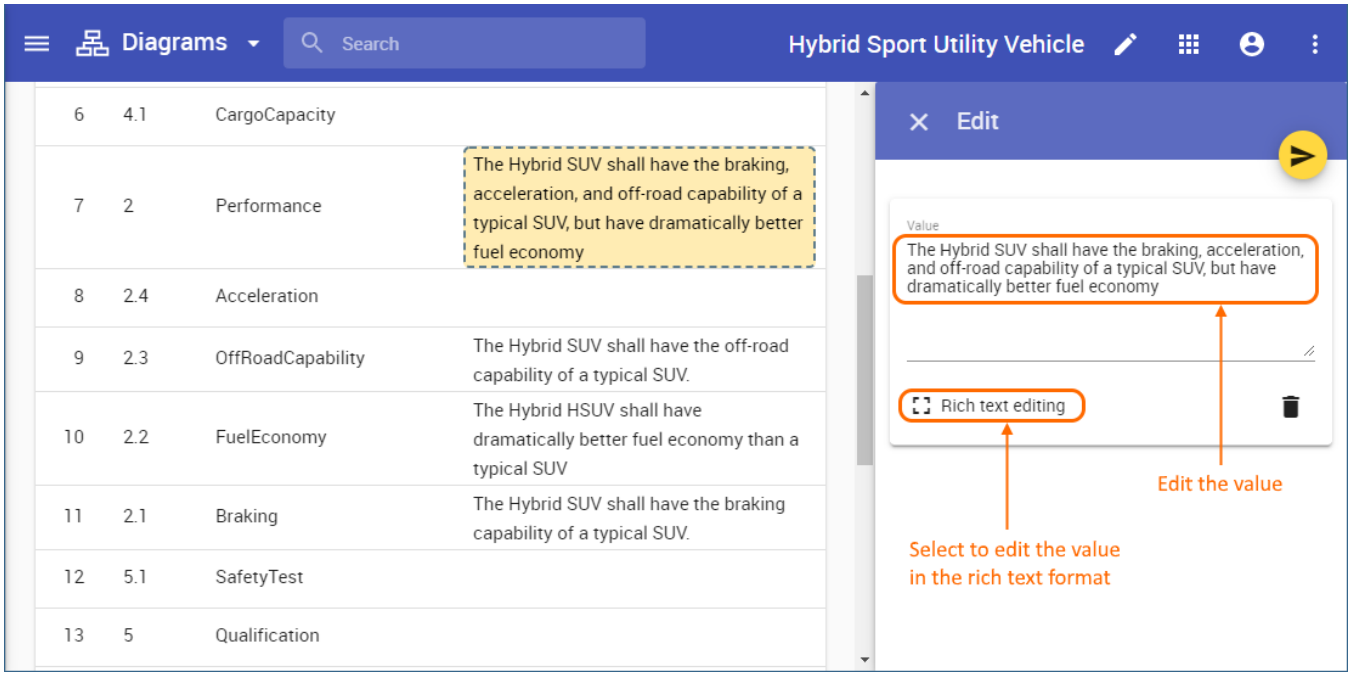
Important

- In order to edit element values in a Cameo Collaborator for Teamwork Cloud document, the document must be published specifically editing.
- Before starting editing element values, read about model editing behavior and constraints to understand how this feature works.

To edit element values in a Cameo Collaborator for Teamwork Cloud document

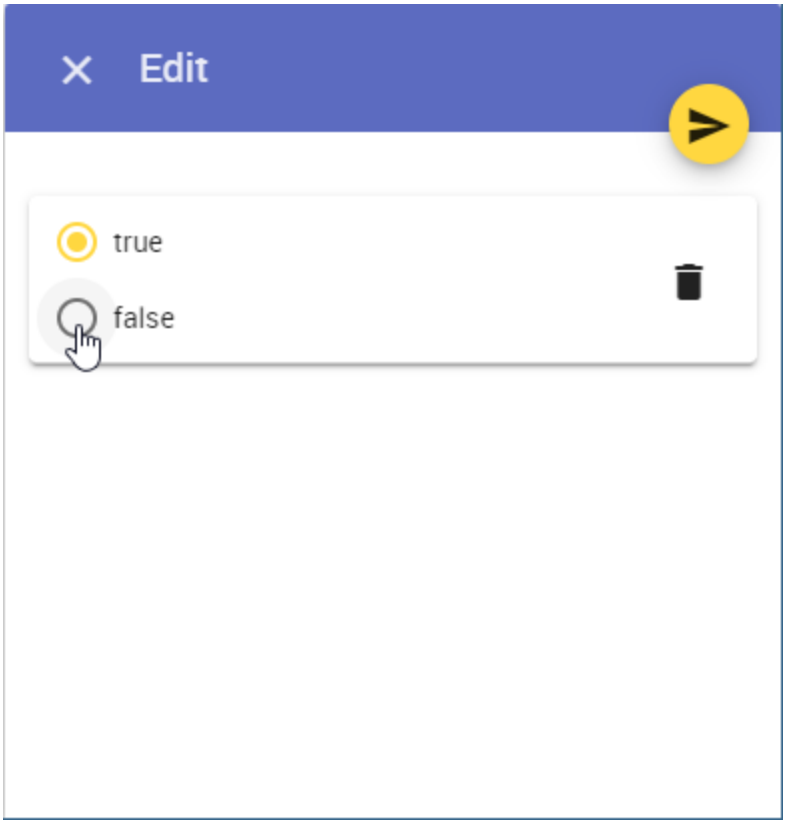
---

1. Open a Cameo Collaborator document.
2. Click on the bottom right corner of the content pane.
3. On the content pane, select the item you want to edit. Editable items are highlighted in yellow when hovering over them with a mouse pointer.
4. When the **Edit** pane (displayed below) opens, change the item value and click to save it.

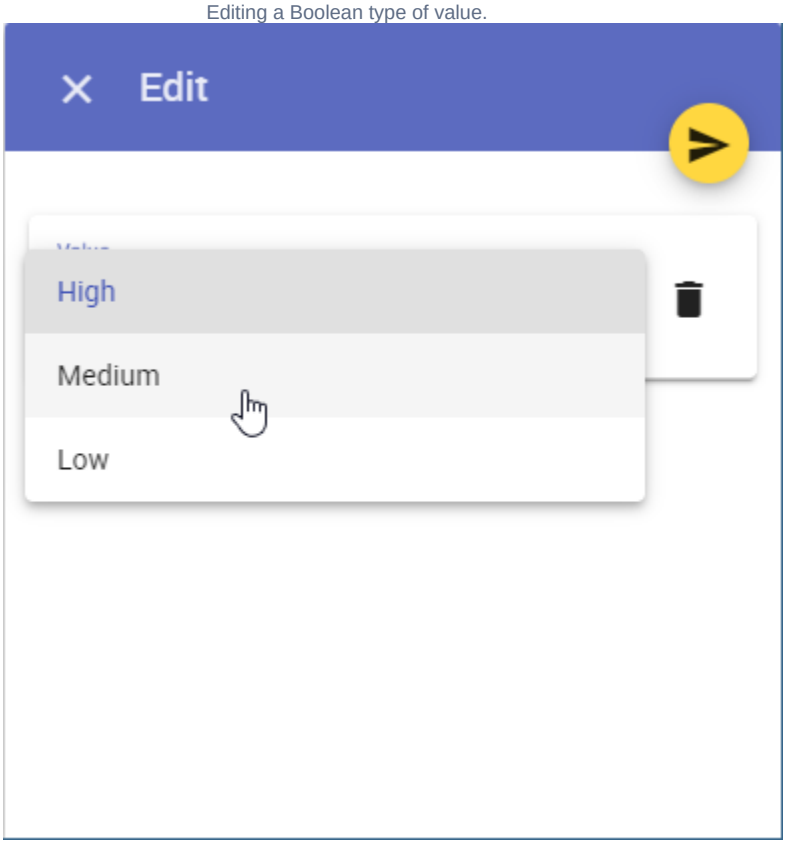


The example shows how you can edit requirement text.

Once you finish the steps described above, the modified item value is saved both in the Cameo Collaborator document and and Teamwork Cloud project. See the figures below for more examples of editing different types of values.



Editing a Boolean type of value.



Editing an Enumeration type of value.

Deleting property values

To delete the value of an editable property:

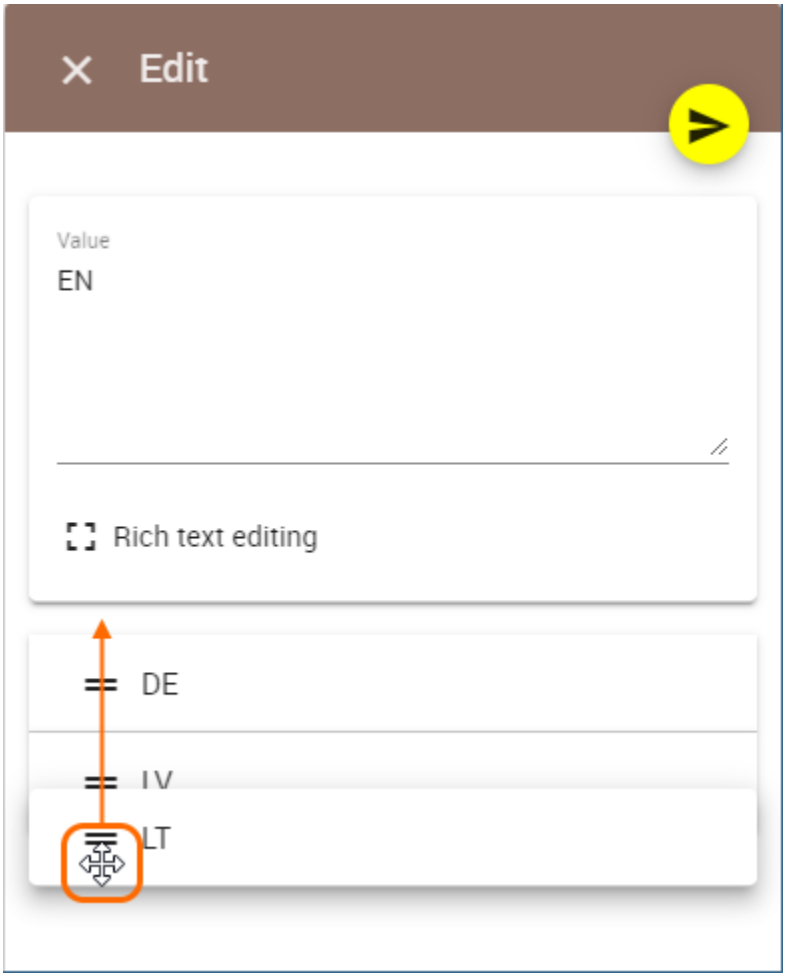
1. Click on the bottom right corner of the content pane.
2. On the content pane, select the item you want to delete. Editable items are highlighted in yellow when hovering over them with a mouse pointer.
3. When the **Edit** pane opens, click next to the value you want to delete.
4. Click to save the changes.

Reordering the values of multi-value properties

You can use the model editing feature to reorder the values of multi-value properties as described below.

To reorder the values of multi-value properties:

1. Open a Cameo Collaborator document.
2. Click on the bottom right corner of the content pane.
3. On the content pane, select the item you want to edit. Editable items are highlighted in yellow when hovering over them with a mouse pointer.
4. When the **Edit** pane opens, drag a value to the desired position as displayed below.



5. Click to save the changes.
