

Uninstalling plugins and deactivating licenses

Uninstalling plugin

To uninstall a plugin

1. Start the modeling tool.
2. In the **Help** menu, select **Resource/Plugin Manager**.
3. In the **Resource/Plugin Manager** dialog, click to select the plugin.
4. Click the **Remove** button.
5. When you receive the message asking if you want to remove the plugin, click **OK**.
6. Restart the modeling tool.

Deactivating license

Prerequisites

- You have the [license owner](#) account credentials.

Procedure

1. Log in at [nomagic.com](#) as a license owner.
2. At the right side of the webpage, under **Members**, click **License Activation Management**.
3. In the first table, all your activated products are listed. In the **Activated products** column, select the tool record to edit.

Activation and License Activation Management screen [usage instructions](#).

Installations status filter: ☒ Enable license select during online activation

Profile ID	First Name	Last Name	Email	Date	Host Id	Installation status	Activated products	Get key	Personal comment
625246	John	Doe	john.doe@example.com	09/09/15	e06995357770	Activated	• MagicDraw 18.2 FR Enterprise Edition Seat License	<input type="button" value="Send"/> <input type="button" value="Download"/>	

4. A new **Edit License Activation Record** window opens. Click the **Deactivate** tab.
5. Select the license you need and click **Deactivate selected**.
6. Your license is deactivated and the allowed rehost number decreased. Close or refresh the **License Activation Management** page.

 Increase the rehost limit, enter the request in the **Request Rehost Increase** box. Your account executive will restore rehosts after receiving this message.

1.

Request Rehost Increase

Rehost limit is exceeded? Request increase from your account executive.

*Confirmed rehost case from the application side, will not decrease rehost limit.
**Rehost is the process of reissuing a license for a different machine. This process requires redefining existing node locked application license rights so that they will work properly on the new system. Number of available rehosts is 1 x for each obtained license per year.
