# Creating annotations

> **IRI Annotation**
> Creating an IRI Annotation is done the same way as creating a Literal Annotation

To create a Literal Annotation and anchoring it to a class

1. In the concept modeling project, click the **Concept Modeling** palette menu to expand it. Select **Literal Annotation**.

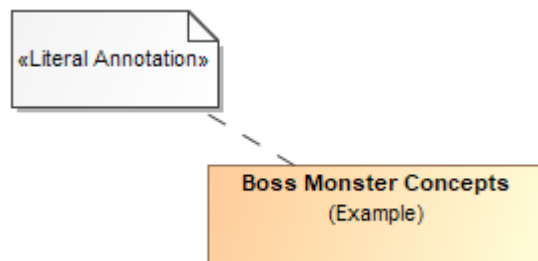

2. Hold the mouse button to draw the Annotation. The Literal Annotation will be created.

3. In the **Concept Modeling** palette menu, select **Anchor**.
4. Hold the mouse button from the created Literal Annotation and draw the Anchor to any element, e.g., *Class,* to anchor it.

5. The Literal Annotation will be anchored with the chosen element.
