

Installation

You need to download the all-in-one plugin pack (the **.rdzip** file) first by doing the following

1. Log on at nomagic.com as a **license** owner.
2. From your [download area](#), download the all-in-one plugin pack to the installation directory of the modeling tool.

You can install the Excel Import plugin by importing the downloaded all-in-one plugin pack (the **.rdzip** file) through **Resource/Plugin Manager** or extracting the plugin pack manually in the modeling tool directory.

To install Excel Import by importing the plugin pack (the **.rdzip** file) through **Resource/Plugin Manager**

1. From the modeling tool main menu, click **Help > Resource/Plugin Manager**. The **Resource/Plugin Manager** dialog opens.

Note

Specify HTTP Proxy Settings for the connection to access MagicDraw updates and resources.

2. Click  to browse the local file system to locate the plugin pack.
3. After importing the plugin pack, click  to close the dialog.
4. Restart the modeling tool. The plugin installation will be completed after restarting the modeling tool.

To extract the plugin pack directly in the modeling tool directory

1. Go to the directory where your modeling tool is installed and extract the downloaded plugin pack.
2. Start the modeling tool. The plugin is applied to your modeling tool.

The Excel Import plugin comes bundled with a sample of **UML2.5 Meta Model with attributes**. You can see this sample after you have downloaded the plugin and restarted your modeling tool (**Help > Resource/Plugin Manager > Samples**).
