SPEM Plugin

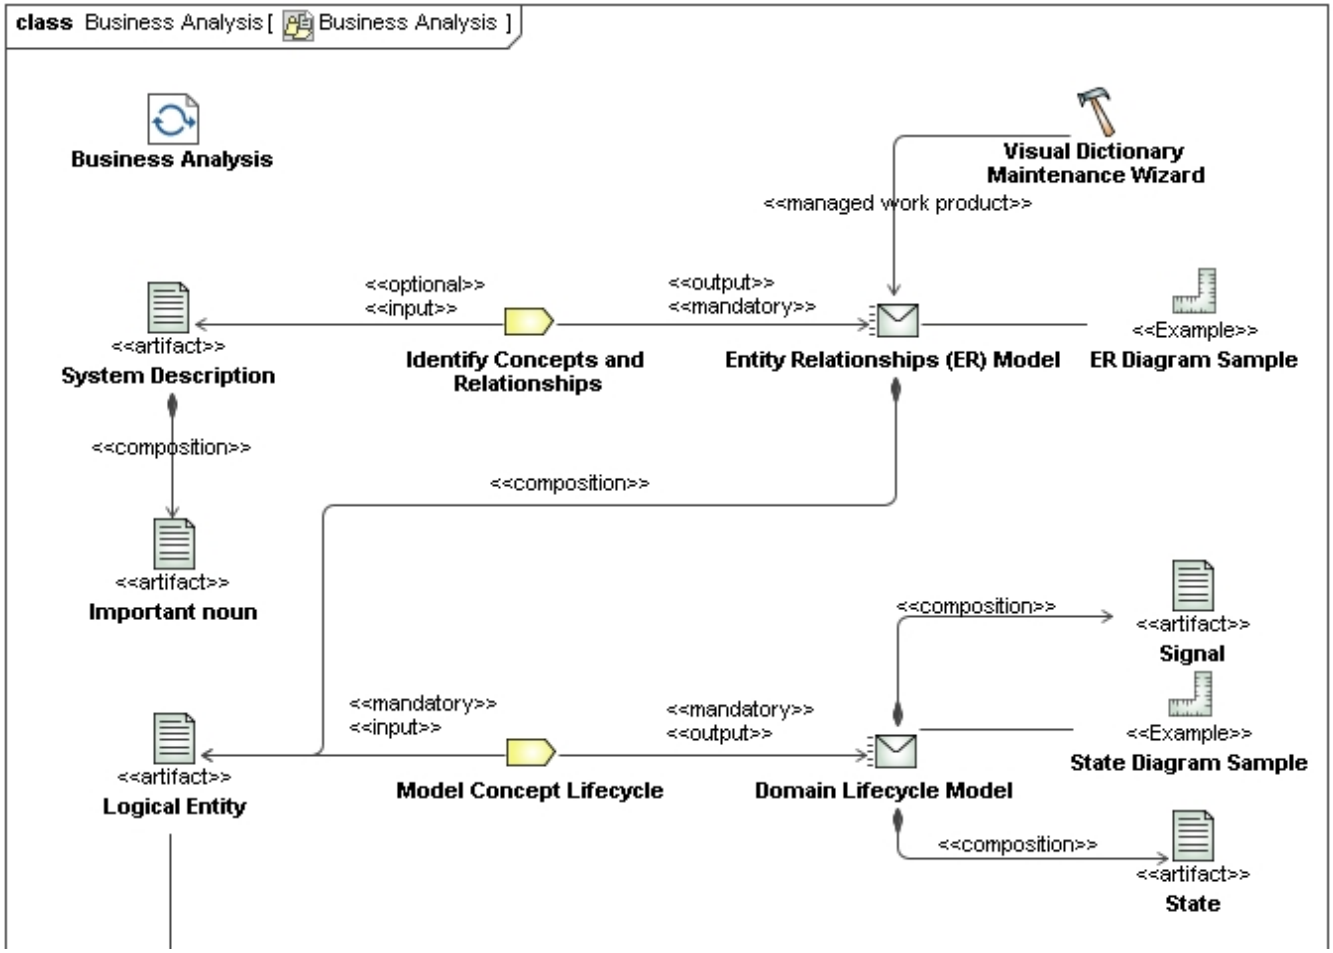

The SPEM 2.0 Plugin is discontinued since the 2024x version release.

Introduction

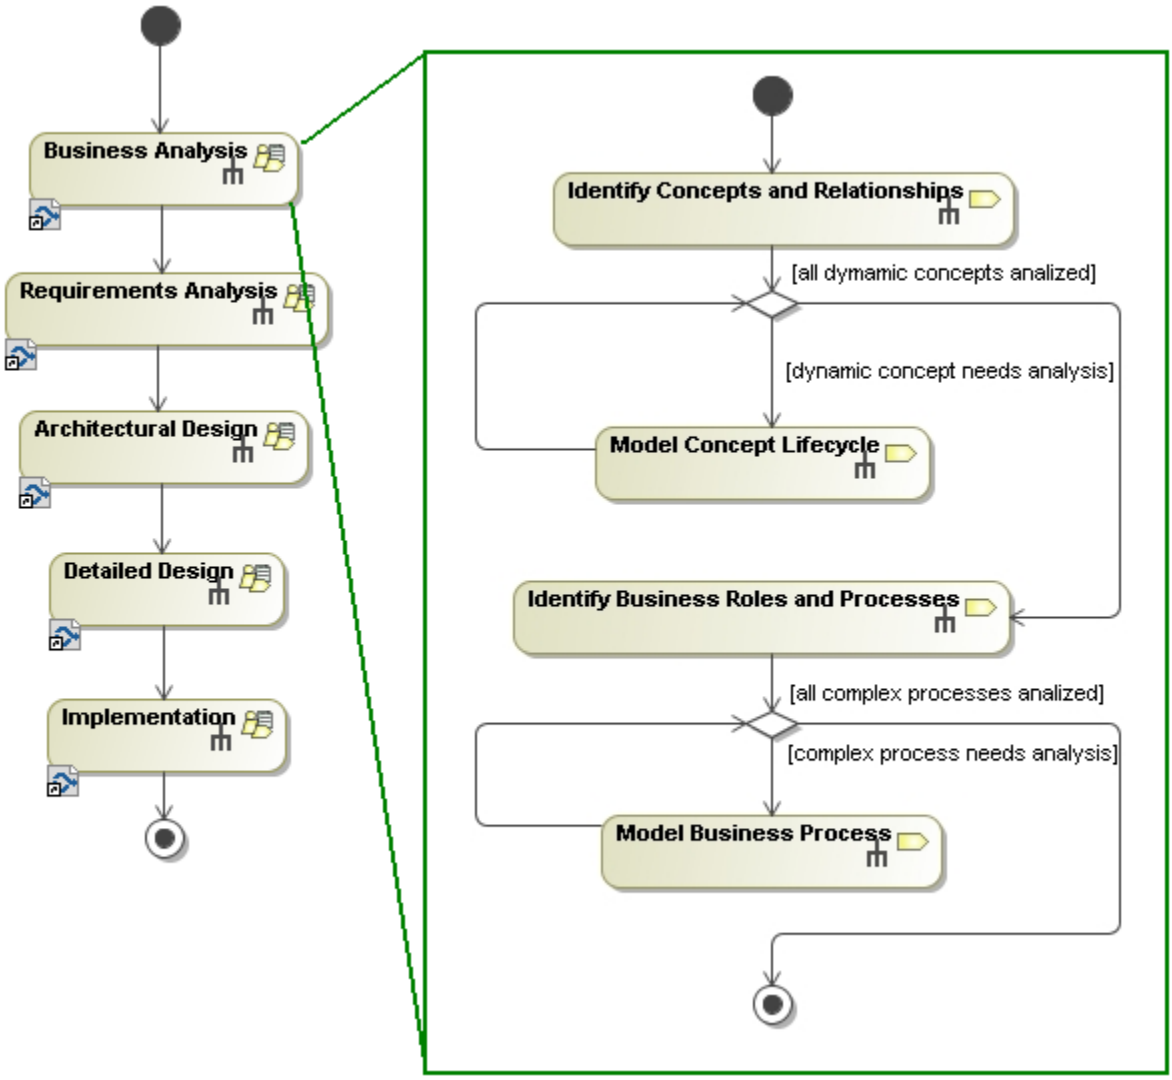

SPEM - Software Process Engineering Metamodel.

Support for Software Process Engineering Metamodel 2.0. MagicDraw supports Software Process Engineering Metamodel (SPEM) 2.0. SPEM is a standard adopted by OMG for software development process definition, specifically including those processes that involve or mandate the use of UML.

Features

SPEM 2.0 does not concentrate on the single method and is defined to describe any kind of software development process: RUP, OpenUP, Scrum, XP.

The preferable way to download the SPEM 2.0 Plugin is using MagicDraw Resource/Plugins Manager (Help -> Resource/Plugins Manager).
