

NCV-5 Capability to Organisational Deployment Mapping

Description

The NCV-5 defines Capability to Organisational Deployment Mapping. It addresses the fulfillment of capability requirements, in particular by network enabled capabilities. The NCV-5 View is used to support the capability management process and, in particular, assist the planning of fielding.

Implementation

NCV-5 can be represented using:

- A NCV-5 table.

If your project has migrated from any earlier than 17.0.1 version, the old NCV-5 View representation based on the UML Class diagram is loaded as the NCV-2 Capability Taxonomy diagram.

- A NCV-5 spreadsheet report.

Sample

Maritime Rescue Team expansion (From 2011-01-01 To 2011-03-31)	Hire new MRT Drivers	Hire new MRT Pilots	Plan training tasks for new employees	Perform training tasks
HR Manager	ERP	ERP	ERP PM Software	
Jr HR Manager	ERP	ERP	ERP	
Qualified Helo Pilot				MRT Pilot Helicopter
Qualified Lifeboat Driver				MRT Driver Boat

NCV-5 Capability to Organization Deployment Mapping

Icon	View	Relationship
	NCV-1 Capability Vision	Capability Phasing is defined in NCV-1.
	NCV-2 Capability Taxonomy	Capabilities shown in NCV-5 table are usually modeled in NCV-2 Capability Taxonomy.
	NPV-2 Programme to Capability Mapping	The timing is based on project milestones from NPV1 which indicate when capability configuration will be delivered to an organization.
	NOV-4 Organizational Relationships Chart	Actual Organizational Resources related to deployment of Capability Configurations are taken from NOV-4 Organizational Relationships Chart.
