Cameo DataHub Documentation

Cameo DataHub is an integral part of No Magic's Cameo Suite providing true interoperability to the business and IT market by solving data interoperability issues between different vendors. Many of our competitors advocate interoperability of various vendor tools through a brokered published interface. Rather than forcing reliance on a myriad of vendors to support such an interfacing strategy, No Magic has taken all of the complexity and finger-pointing out of the integration puzzle: No Magic does it all by being your single-source guarantor against multi-source and multi-vendor incompatibility headaches. Technologies from No Magic maintain constant awareness of competitor's proprietary formats and assure continual compatibility between products.
