

Running DataHub

After the DataHub plugin is installed, and the license is applied, it is now ready to use.

To start DataHub

1. Start **MagicDraw** and open an existing or new project.
2. From the MagicDraw main menu, click **Tools > DataHub > DataHub Explorer** to open **DataHub Explorer**.

The next chapter discusses the DataHub User Interface elements and subsequent chapters explain how to use those features to complete various DataHub tasks.
