

# Upgrading from previous versions of Cameo DataHub

Upgrading the DataHub version means that you need to remove the older version first before the installation of the later version. After you remove the current DataHub version, you can use one of the two installation methods, [installing Cameo DataHub using Resource/Plugin Manager](#) or [installing Cameo DataHub from the plugin source zip file](#), to reinstall DataHub.

To upgrade the DataHub version

---

1. On the MagicDraw main menu, click **Help > Resource/Plugin Manager**. The **Resource/Plugin Manager** dialog opens.
2. Select the **Cameo DataHub** check box under the **Plugins (commercial)** option and click  .

After you have removed Cameo DataHub, you can reinstall it using one of the two installation methods, [installing Cameo DataHub using Resource/Plugin Manager](#) or [installing Cameo DataHub from the plugin source zip file](#).
