# Creating Requirements Project
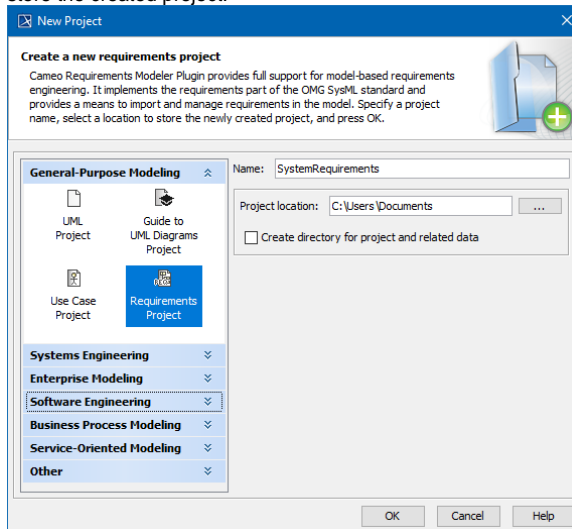

You can create requirements using the the Requirements Project template. It contains predefined packages, elements, and diagrams to start creating your own requirements in the model.

> The Requirements Project template is only available in MagicDraw with Cameo Requirement Modeler Plugin installed.
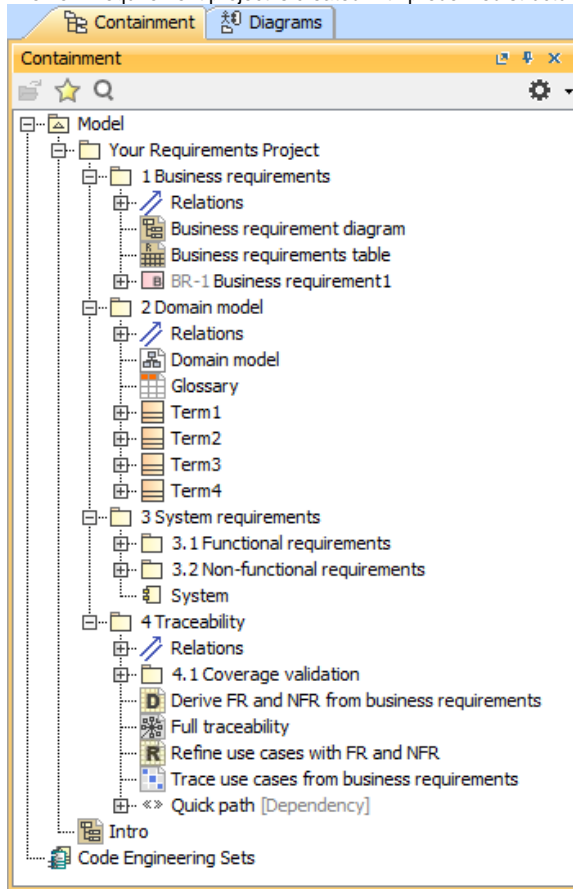

To create a Requirement Project

1. Open the **New Project** dialog. Do one of the following:
   - From the **File** menu, select **New Project**.
   - On the main toolbar, click the **New Project** button.
   - Press Ctrl + Shift + N.
2. In the **New Project** dialog, specify the following:
   - On the left side of the dialog, under the **General-Purpose Modeling** domain, select the **Requirements Project**.
   - On the right side of the dialog, type the file name in the **Name** box.
   - On the right side of the dialog, click the [...] button and select the location to store the created project.

3. Click **OK**.
   The new Requirement project is created with predefined structure as shown in the image below.
