

MinInclusive

Maps to a UML Attribute with the stereotype XSDminInclusive. The name and type of such an attribute do not make sense.

- value – to Attribute initial value.

minInclusive XML representation summary

```
<minInclusive
  fixed = boolean : false
  id = ID
  value = anySimpleType
  {any attributes with non-schema namespace...}>
  Content: (annotation?)
</minInclusive>
{value} must be in the value space of {base type definition}.
```

minInclusive XML code sample

The following is the definition of a user-derived datatype which limits values to integers greater than or equal to 100, using minInclusive.

```
<simpleType name='one-hundred-or-more'>
  <restriction base='integer'>
    <minInclusive value='100' />
  </restriction>
</simpleType>
```
