

Clearing values from rows

To clear values from an entire row

1. Right-click the number cell to select the entire row.
2. From the shortcut menu, click **Clear**.
Alternatively, you can press **Delete** on your keyboard after selecting the entire row.

Data types

Only String, Boolean, Number, or Enumeration data types can be cleared from a cell.

To clear a value from a cell

1. Right-click the specific cell of the row.
2. From the shortcut menu, click **Clear**.
Alternatively, you can press **Delete** on your keyboard after selecting the cell.
