Editing custom roles

On this page

- · Editing role details
- Changing role permissions

After creating a role, you can modify it by changing its name, description, and permissions as described in the following sections.

Editing role details

In the Roles application, you can edit the name and description of a custom role as described below.

To edit role details

- 1. Do one of the following actions:
 - . In the content pane of the Roles application, select a role and when the Role pane opens, click the Edit button in the role details card.

Name ↑ X Role 24 Edit Resource Properties I 24 Edit Resources I 24 Edit Resources I 24 Edit Resource Access Right I 24 Read Resource Access Right I 24 Read Resource Contributor I 25 Resource Contributor I 26 Resource Creator I 27 Resource Editor I	Roles	Q Role search		₩ 0

CHANGE	**	Resource Editor	+	CHANGE

- In the content pane of the Roles application, click * next to a role name and select Edit role details.
- 2. When the Edit role details pane opens, change role name and or description and click 🚩

Changing role permissions

You can use the Roles application to add or remove permissions of a custom role. Note that a role must have at least one permission.

To add or remove permissions of a role

- In the content pane of the Roles application, select a role and when the Role pane opens, click the Change button in the role details card.

• In the content pane of the Roles application, click • next to a role name and select Change permissions.

2. When the Change permissions pane opens, select the permissions you want to assign to the role (as shown below) and/or clear the checkboxes next to the permissions you want to remove.

← Cha	← Change permissions	
🖃 se	elect all	
	Administer Resources	
~	Edit Resources	
~	Edit Resource Properties	
	Manage Model Permissions	
	Manage Owned Resource Access Right	
	Read Resources	
	Release Resource Locks	
~	Remove Resource	

3. Click **>** to save the changes.
