Performance

- Where can I find log files of a modeling tool, Cameo Collaborator, and Teamwork Cloud
- I suspect a performance problem. How do I solve it
- What are the common recommendations to increase performance
- After loading a project, there wasn't a big memory usage but after some actions it increased dramatically. How could I manage it
- From time to time, we receive Out Of Memory exceptions. I suspect that these exceptions are caused by MagicDraw memory leaks. How would you suggest solving this problem?
- MagicDraw does not display Chinese, Hindi, Japanese, Korean, Thai, or some special symbols, such as superscript and subscript. Can this be fixed?
- MagicDraw freezes. Do you know how to fix that?
- My modeling tool freezes when I open the Specification window while in full-screen mode on Mac OS X
- Sometimes when running the program the OutOfMemory error occurs.
- When I attempt to open certain file dialog boxes, it takes several minutes for the file dialog to open.
