

REST API Change Log

On this page

- [Changes in data types](#)
- [URLs Relocated](#)
- [New URLs](#)
- [API Documentation \(for more clarified information\)](#)

Changes in data types

Branch (output only)

Name	Type	Status	Remark
createdDate	Integer	Added	The date created.
propagateToChilds	Boolean	Added	Indicate whether metadata entries are propagated to child branches.
removed	Boolean	Added	Indicate if the branch is removed.

PermissionInfo and affected URLs

Name	Type	Status	Remark
protectedType	String	Removed	Use protectedTypes.
protectedTypes	String[]	Added	A list of protected types supported by this permission.
protectedTypeDisplayName	String	Value changed	Display a name of the protected type, separated by a ' ' mark, e.g., "resource category".

The affected URLs are as follows:

- /admin/roles
- /admin/permissions
- /resources/{resourceId}/roles
- /workspaces/{workspaceId}/resources/{resourceId}/roles

ProtectedObjectInfo and affected URLs

Name	Type	Status	Remark
containerId	string/UUID	Added	A container ID of the protected object (support only the current version), "eb0880d8-18a1-4761-8134-fae25c794326".

The affected URLs are as follows:

- /admin/usergroups?includeBody=true
- /admin/users/{username}
- /admin/users/{username}/roles

LdapPost

Name	Type	Status	Remark
environment.usergroup_query	String	Added	A query string for retrieving user groups from LDAP.

The affected URL is as follows:

- /admin/ldaps

LdapImportUser

Name	Type	Status	Remark
group	Boolean	Added	True or false to indicate whether the group is imported by default in case both the user and user group have the same name.

The affected URL is as follows:

- /osmc/admin/ldaps/{ldapId}/import/{username} - POST

Assignees

Define a new type for URLs.

The affected URLs are as follows:

- /osmc/resources/{resourceId}/roles/{roleId}
- /osmc/workspaces/{workspaceId}/resources/{resourceId}/roles/{roleId}
- /osmc/workspaces/{workspaceId}/roles/{roleId}

URLs Relocated

From	To	Remark
/osmc/admin/users/currentUser	/osmc/admin/currentUser	Response status is changed from 301 to 307.

New URLs

Read-only branch permission

- /osmc/admin/usergroups/{usergroupId}/resources/{resourceId}/branches/readonly
- /osmc/admin/users/{username}/resources/{resourceId}/branches/readonly

CRUD is for read-only branch settings

Category-level permission

- /osmc/workspaces/{workspaceId}/roles
- /osmc/workspaces/{workspaceId}/roles/{roleId}
- /osmc/workspaces/{workspaceId}/roles/{roleId}/usergroups
- /osmc/workspaces/{workspaceId}/roles/{roleId}/usergroups/{usergroupId}
- /osmc/workspaces/{workspaceId}/roles/{roleId}/users
- /osmc/workspaces/{workspaceId}/roles/{roleId}/users/{username}

API Documentation (for more clarified information)

The following changes are clarifications for existing APIs. Types defined in the Swagger document are updated, but APIs are not changed.

- /osmc/admin/ldaps/{ldapId}/resync/usergroups

PATCH

Name	Changed element	From	To
all	Type	String	Boolean
includeBody	Type	String	Boolean

- /osmc/admin/ldaps/{ldapId}/resync/users

PATCH

Name	Changed element	From	To
all	Type	String	Boolean
includeBody	Type	String	Boolean

- /osmc/admin/permissions

GET

Name	Changed element	From	To
resourceScope	Type	String	Boolean

- /osmc/admin/usergroups

GET

Name	Changed element	From	To
includeBody	Type	String	Boolean

PUT

Name	Changed element	From	To
includeNew	Type	String	Boolean

- /osmc/admin/usergroups/{usergroupId}
GET

Name	Changed element	From	To
filter	Type	String	Boolean

- /osmc/admin/usergroups/{usergroupId}/roles
GET

Name	Changed element	From	To
resourceName	Type	String	Boolean
filter	Type	String	Boolean

- /osmc/admin/users
GET

Name	Changed element	From	To
includeBody	Type	String	Boolean
group	Type	String	Boolean

- /osmc/admin/users/{username}
GET

Name	Changed element	From	To
permission	Type	String	Boolean
group	Type	String	Boolean
userGroups (output)	Type	String[]	UserGroup[] (ID only by default).

- /osmc/admin/users/{username}/roles
GET

Name	Changed element	From	To
resourceName	Type	String	Boolean
filter	Type	String	Boolean

- /osmc/resources
GET

Name	Changed element	From	To
includeBody	Type	String	Boolean
includeRemovedResource	Type	String	Boolean

- /osmc/resources/{resourceId}/artifacts/{artifact}
 /osmc/resources/{resourceId}/branches/{branchId}/artifacts/{artifact}
 /osmc/resources/{resourceId}/branches/{branchId}/revisions/{revision}/artifacts/{artifact}
 /osmc/resources/{resourceId}/revisions/{revision}/artifacts/{artifact}
 /osmc/workspaces/{workspaceId}/resources/{resourceId}/artifacts/{artifact}
 /osmc/workspaces/{workspaceId}/resources/{resourceId}/branches/{branchId}/revisions/{revision}/artifacts/{artifact}
 /osmc/workspaces/{workspaceId}/resources/{resourceId}/revisions/{revision}/artifacts/{artifact}

GET

Name	Changed element	From	To
download	Type	String	Boolean

- /osmc/resources/{resourceId}/branches/{branchId}/elements
 /osmc/resources/{resourceId}/branches/{branchId}/elements/{elementId}
 /osmc/resources/{resourceId}/elements
 /osmc/resources/{resourceId}/elements/{elementId}
 /osmc/workspaces/{workspaceId}/resources/{resourceId}/branches/{branchId}/elements
 /osmc/workspaces/{workspaceId}/resources/{resourceId}/branches/{branchId}/elements/{elementId}
 /osmc/workspaces/{workspaceId}/resources/{resourceId}/elements
 /osmc/workspaces/{workspaceId}/resources/{resourceId}/elements/{elementId}

PUT

Replace all the attributes of an element in a particular branch so that PUT at the URL updates the element specified by **elementId**. The specified attributes are updated while attributes not included in the request are reset. New values are specified in **kernel:esiData**.

- /osmc/resources/{resourceId}/branches/{branchId}/locks
DELETE

Name	Changed element	From	To
userNames	Type	String	String[]

- /osmc/resources/{resourceId}/branches/{branchId}/locks
/osmc/workspaces/{workspaceId}/resources/{resourceId}/branches/{branchId}/locks
/osmc/workspaces/{workspaceId}/resources/{resourceId}/locks
GET

Changed element	From	To
Response type	#/definitions/osmc/admin/workspaces/workspaceId/resources/resourceId/locks/get	#/definitions/LockResults

- /osmc/resources/{resourceId}/locks
DELETE

Name	Changed Element	From	To
userNames	Type	#/definitions/osmc/admin/workspaces/workspaceId/resources/resourceId/locks/delete	#/definitions/arrayOfString

- /osmc/resources/{resourceId}/locks
GET

Changed Element	From	To
Response Type	#/definitions/osmc/admin/workspaces/workspaceId/resources/resourceId/locks/get	#/definitions/LockResults

- /osmc/resources/{resourceId}/revisiondiff
/osmc/workspaces/{workspaceId}/resources/{resourceId}/revisiondiff
GET

Name	Changed element	From	To
source	Type	String	Integer
target	Type	String	Integer

- /osmc/resources/{resourceId}/revisions
/osmc/workspaces/{workspaceId}/resources/{resourceId}/revisions
GET

Name	Changed element	From	To
includeBody	Type	String	Boolean
page	Type	String	Integer
items	Type	String	Integer
search	Type	NA	String

- /osmc/workspaces
GET

Name	Changed Element	From	To
includeBody	Type	String	Boolean

PUT

Name	Changed Element	From	To
includeNew	Type	String	Boolean

- /osmc/workspaces/{workspaceId}/resources

GET

Name	Changed Element	From	To
includeBody	Type	String	Boolean
includeRemovedResource	Type	String	Boolean

- /osmc/workspaces/{workspaceId}/resources/{resourceId}/branches/{branchId}/locks
/osmc/workspaces/{workspaceId}/resources/{resourceId}/locks

DELETE

Name	Changed element	From	To
------	-----------------	------	----

userNames	Type	#/definitions/osmc/admin/workspaces/workspaceID/resources/resourceID/locks/delete	#/definitions/arrayOfString
-----------	------	---	-----------------------------
