

Standards Parameters

Description

The Standards Parameters (Sd-Pm) domain depicts the measurements of resources.

The intended usage of the Standards Parameters (Sd-Pm) domain includes:

- Definition of performance characteristics and measurements.
- Identification of non-functional requirements.

Implementation

The Standards Parameters (Sd-Pm) domain is represented by:

- [Typical Measurements table](#).
- [Hierarchical Typical Measurements table](#).
- [Actual Measurements table](#).
- Actual Measurements (.xlsx).
