

What's new in Cameo Systems Modeler 18.0 LTR SP3

Released on: February 9, 2015

Main Issues Fixed in This Service Pack

- The **Show Inherited** property is not included in the Port's **Symbol Properties** dialog. Customized properties inherited from Block properties are not available when creating a property for a custom Block based on SysML Block after you click the smart manipulator  on custom Block shape.
- Redefined property is incorrectly included in the Context-Specific Values compartment.
- The Value property type and its default value are not displayed in the Values compartment.
- Internal error occurs after clicking the **Report** button on the Diagram toolbar of a Requirements Table.
- It is not possible to specify the type for a Value Property.
- Unnecessary Sync solver is suggested for Classifier Behavior Property when the Block does not have classifier behavior.
- The **Business Process Modeling** category is missing in the **New Project** dialog after Cameo Business Modeler Plugin is installed into Cameo Systems Modeler.
- After migration, the Method tagged values are hidden by default.
- UPDM project allows creating SysML adjunct properties while using Activity Decomposition Hierarchy Wizard.
- In a SysML project, the **SysML Diagrams** menu command incorrectly appears directly on the shortcut menu of the Use Case selected in the Containment tree.
