

What's new in Cameo Simulation Toolkit 18.0 LTR SP3

Released on: February 9, 2015

Main Issues Fixed in This Service Pack

- Simulation will no longer terminate once encountering an unsolvable constraint.
- Simulation Toolkit has been fixed to terminate the simulation completely.
- CallMessage can now call to the target operation if the interaction is activated from a StateMachine.
- Message will now correctly display in Console Panel when the "Show user output only" option is selected.
- Pins can now be displayed correctly, as the conflicting "create mandatory pins" environment option has been removed.
- ALH can now set the value of boolean property with the enumeration "true" and "false".
- Cameo Simulation Toolkit now supports the simulation of state machine with an unnamed change event.
- Built-in math solver has been fixed to work with Java 8.
- Cameo Simulation Toolkit has been fixed to correctly work with the constraint from subtype of the constraint block typing the constraint property.
- CoffeeMachine sample project has been fixed to work correctly.
- Mock-up panel is now correctly updated after removing values from Variables pane.
