Where can I find lmgrid or lmadmin log file?

The location of the log file depends on what license server manager you use.

- If it is *lmgrid*, the *cameo.log* and *lmgrid.log* files can both be found directly in the root package of the lmgrid installation.
- If it is *lmadmin*, the *cameo.log* file can be found in *<lmadmin installation directory>\logs*, for example, *C:\Program Files\FlexNet Publisher License Server Manager\logs*.

Note: The default location of the log file can be changed during the product configuration.
