What's new in Cameo Business Modeler Plugin 18.0 LTR SP3

Released on: February 9, 2015

Main Issues Fixed in This Service Pack

- Hyperlink is not updated when the value of a Referenced Diagram is changed.
- Choreography task messages are not visible in a Choreography diagram.
- Business Process Modeling category is missing in the New Project dialog, after Cameo Business Modeler plugin is installed into Cameo System Modeler.
- When there are numerous validation errors, the message window that appears does not fit some screens and does not allow user to resize or scroll it, making the buttons in the bottom of the window unaccessible.
- Elements in a Collaboration diagram are displayed incorrectly after unsuppressing pool contents.
- Call Activity does not display both action and behaviour names after reusing a process in another Process diagram.
