

Displaying MagicDraw Data Sources

MagicDraw® Data Sources are shown by default in the MagicDraw® Containment tree and not in the **DataHub Explorer** tree.

To display a MagicDraw® Data Source in the **DataHub Explorer** tree

1. On the MagicDraw main menu, click **Options > Environment**. The **Environment Options** dialog opens. Select **Cameo DataHub** on the left.

2. In the **General** options group, clear the **Filter a MagicDraw data source from DataHub explorer** ☒ **true** check
3. A MagicDraw® Data Source appears in the **DataHub Explorer** tab.
