

# Specifying diagram style properties

In the **Diagram Properties** dialog, you can customize the diagram's style: color, grid, diagram info, font, etc. This allows for your diagram to stand out from other diagrams in your project, or simply just for aesthetic purposes.

To open the **Diagram Properties** dialog

There are multiple ways to bring up the dialog, so do one of the following:

- Select **Diagram Properties** from the diagram shortcut menu.
- Press Shift+Enter.

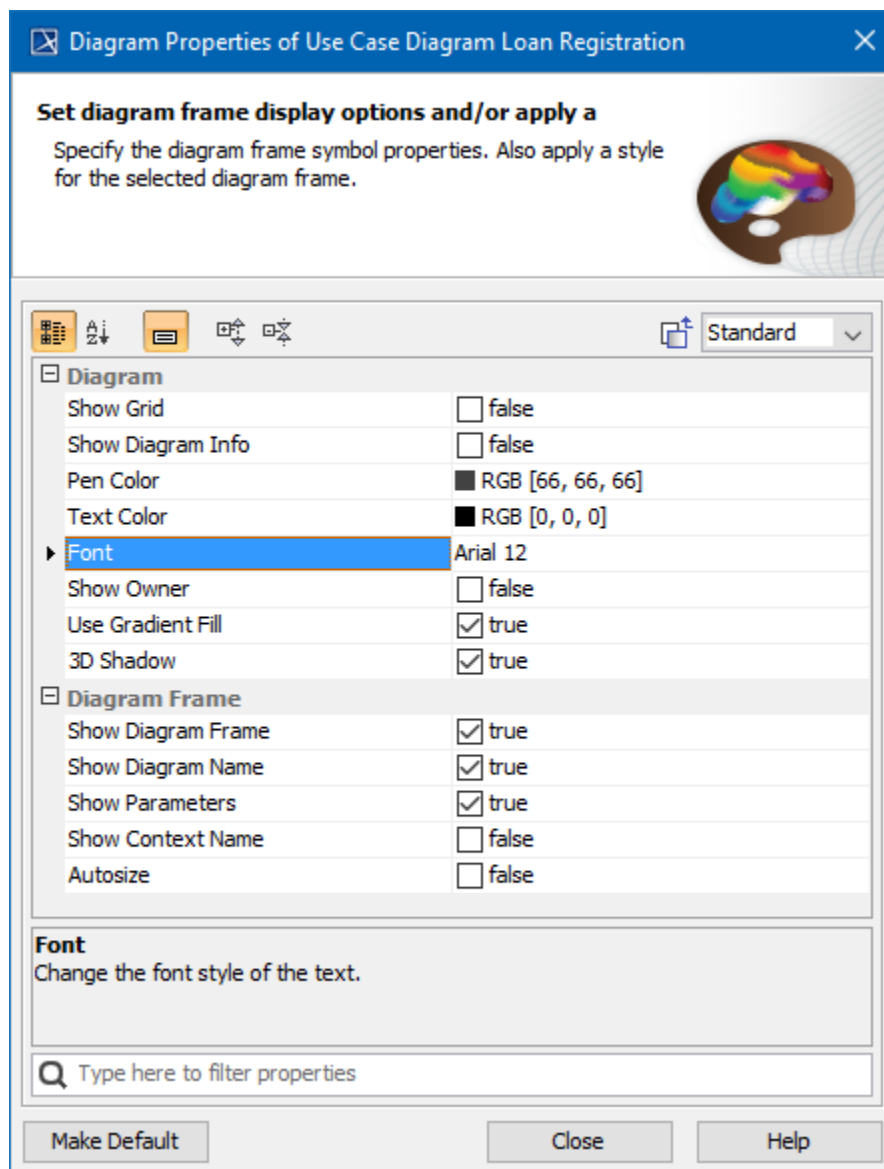

Diagram properties dialog.
