

Query tool

The Query tool provides extra functions to retrieve elements by using a query language. Like other Custom tools, the Query tool '*querytool.jar*' must be presented in the 'extensions' folder of the Report Wizard plugin. For further information on Custom tools and the installation, see [Custom tool](#).

Type the following code in a template to import the Query tool.

```
#import('query', 'com.nomagic.reportwizard.tools.QueryTool')
```
