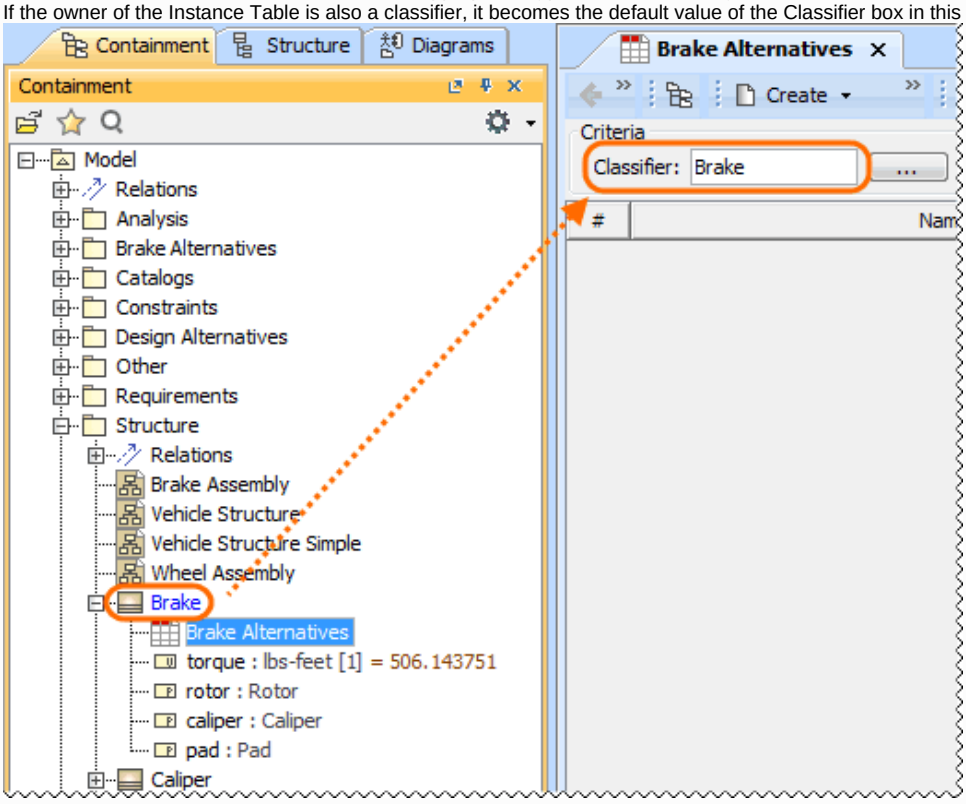
Creating an empty Instance Table

To create an empty Instance Table

---

1. In the Containment tree, select an element to be the owner of the Instance Table.
2. Do one of the following:
   - From the main menu, select **Diagrams** > **Create Diagram**. Type “ins” and press Enter.
   - On the main toolbars, click the **Create Diagram** button. Type “ins” and press Enter.
   - Press Ctrl+N. Type “ins” and press Enter.
   - Right-click the element and from the shortcut menu select **Create Diagram** > **Other Diagrams** > **Instance Table**.

   The newly created Instance Table opens on the right side of the application window.


- If the default name of the Instance Table is not appropriate, type a new one directly in the Containment tree.
- If the owner of the Instance Table is also a classifier, it becomes the default value of the Classifier box in this Instance Table.
