CORBA IDL Mapping To UML

Reference:

http://www.omg.org/technology/documents/profile_catalog.htm#UML_for_CORBA.

CORBA IDL mapping to UML is based on the UML Profile for CORBA Specification, Version 1.0, April 2002.

Availability

This functionality is available in the Enterprise edition only.

The differences between the UML Profile for CORBA specification and mapping in MagicDraw are listed below.

- Constraints defined in the UML Profile for CORBA specification are not checked in MagicDraw.
- The stereotype CORBAAnonymousFixed is introduced. It is used to represent anonymous fixed types of a stereotype. Fixed types without names
 are mapped to inner classes with the stereotype CORBAAnonymousFixed. These classes are bound to CORBA::fixed classes.IDL Code:

MagicDraw presents a CORBA IDL diagram that simplifies the creation of standard CORBA IDL elements. The following elements are available in the CORBA IDL diagram:

| Button | Shortcut Key | Model Element |
|--------|--------------|---------------------|
| M | М | CORBA IDL Module |
| | I | CORBA IDL Interface |

| | V | CORBA IDL Value |
|-----|-----------|------------------------------|
| P | Shift + P | Class by Pattern |
| P | G | Generalization |
| PT | | Truncatable Generalization |
| Pus | | Value Support Generalization |
| | | CORBA IDL Association |
| -0 | I | Interface |
