Working with Personnel Constraints table

To create a Personnel Constraints table by adding a new Resource

1. Click the **Add New** button to add a new Resource Constraint. The new row in the table is added.
2. Click ⊡ in the cell and in the **Select Subject Of Resource Constraint** dialog, choose Resource Artifact, Software, Capability Configuration, Organization, Post, Function, Data Element, or Resource Exchange.
3. Define the **Rule Specification**.

> ⚠ The Rule Specification can be defined in English as well as using expressions or formulas.

4. Select the **Rule Kind** from one of the following:
   - Structural Assertion
   - Action Assertion
   - Derivation
   - Contract
   - Constraint
   - Guidance
   - Security Policy
   - Caveat

> ⚠ You can assign more than one Resource for one constraint.

To create a Personnel Constraints table by adding and existing Resource

- Click the **Add Existing** button to add an existing Resource Constraints in the model.
