

Standards Taxonomy

Description

The Standards Taxonomy (Pj-Tx) domain shows technical and non-technical standards, guidance and policy applicable to the architecture. It shows the taxonomy of types of technical, operational, and business standards, guidance and policy applicable to the architecture.

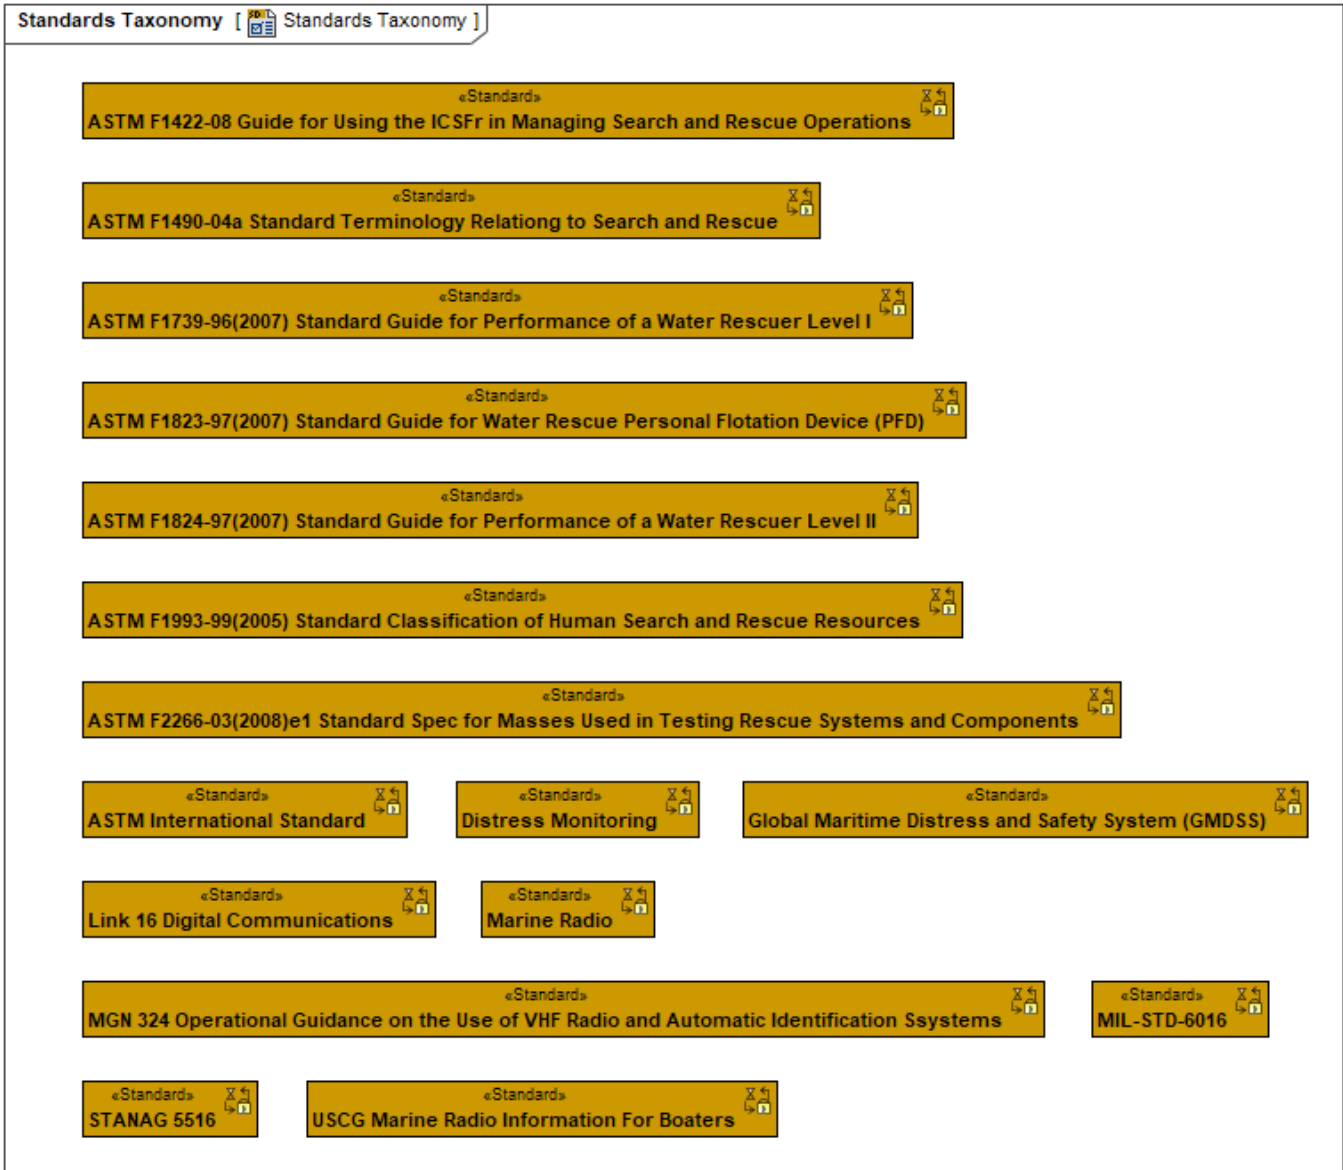

The intended usage of the Standards Taxonomy (Pj-Tx) domain includes:

- Application of standards (informing project strategy).
- Standards compliance.

Implementation

The Standards Taxonomy (Pj-Tx) domain is represented by [Standards Taxonomy](#) diagram.
