

Creating and Using a BPMNEvent

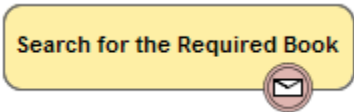

This section will describe how to create and specify Events in BPMN diagrams.

To create a BPMNEvent

- On the Process diagram palette, click a desired event button and then select a type of BPMNEvent.

To create a Boundary Event

- On the Process diagram palette, click the **Boundary Event (Message)** button and then select a type of Boundary Event.
- Click an Activity or Choreography Activity in the diagram.

To change a BPMNEvent type

 You can change an Event type for Start, Intermediate, Boundary, or End Events.

- Right-click a created BPMNEvent and select a new BPMNEvent type.

To change a Start Event to non-interrupting, do one of the following

 **Not all Start Event types can be non-interrupting. The command *Is Interrupting* is only available for the following Start Event types:**

- Message Start Event
 - Right-click the Start Event and on the shortcut menu click **Is Interrupting > False**.
 - Open the Start Event Specification window. In the **Is Interrupting** property box, select **False** and click **Close**.
- Escalation Start Event
- Conditional Start Event

To change a Boundary Event to non-interrupting, do one of the following

- Signal Start Event

 **Not all Boundary Event types can be non-interrupting. The command *Cancel Activity* is only available for the following Boundary Event types:**

- Message Boundary Event
 - Right-click the Boundary Event and on the shortcut menu click **Cancel Activity> False**.
 - Open the Boundary Event Specification window. In the **Cancel Activity** property box, select **False**, and then click **Close**.
- Signal Boundary Event
