Timer Start Event

Description

A Timer Start Event allows a particular time and date or cycle setting, for example, on Mondays at 9 A.M., to trigger the start of a process.

A Timer Start Event displays any of the following on a diagram:

- A Timer Start Event name if the name is specified.
- A Time Cycle property name if the name is unspecified.
- A Time Date property if the name and Time Cycle are unspecified.

Notation

- Interrupting Timer Start Event

- Non-interrupting Timer Start Event
