

Document modes

You can view a Cameo Collaborator for Teamwork Cloud document in two modes:

- **Model view** - In this mode, the [content pane](#) of a document portal shows only the content of the item selected in the [navigation pane](#). The **Model view** is the default mode of a Cameo Collaborator document.
- **Document view** - This mode allows you to browse a Cameo Collaborator document continuously. You can scroll through the entire content of the selected model view, or select an item in the navigation pane to load the related content.

To change the mode of a Cameo Collaborator for Teamwork Cloud document

1. Click  **Unknown Attachment** in the app bar of a Cameo Collaborator document and select the model view whose mode you want to change.
2. Click  **Unknown Attachment** on the right side of the app bar and select the desired mode (**Model view** or **Document view**).

After changing the document mode, the selected model view in the document is reloaded and displayed in a new mode.
