

Migrating data and upgrading Magic Collaboration Studio

Depending on whether you need your current database or not, there are two different approaches you can use:

- If you do not need your current database, uninstall the old Magic Collaboration Studio version and install a new one as described in [Upgrading Magic Collaboration Studio](#).
- If you need the current database, migrate it as described in [Migrating database](#). Note that there are several [migration strategies](#) you can use. After migrating the database and upgrading Magic Collaboration Studio, you must [update your projects](#) as well.

The following sections provide instructions on how to upgrade Magic Collaboration Studio and migrate data.
