Importing trace relationships

The following example shows you how to import some trace relationships into the created TestCases.

To import trace requirements

1. Click File > Import From > Import CSV to start the CSV wizard interface, see figure below.

	Create Map Group	Execute Map Group Set De	imiter		
arget Package	Targe	et Element Type	Target Stereotype	Target Diagram Type	
Model		action	Expose [SysML]	Activity Decomposition Map	
🖹 Requirement		otCallAction	fmu [additional_stereotypes] HyperlinkOwner [MagicDraw Profile]	Activity Diagram	
🖹 TestCases		DIEVentAction	InvisibleStereotype [MagicDraw Profile]	Blackbox ICD Table	
		nExecutionSpecification nInputPin	migrationLog [MagicDraw Profile]	Class Diagram Communication Diagram	
	Activi		mount [MagicDraw Profile]	Component Diagram	E
	Activi	ityFinalNode	NumberOwner [DSL Customization]	Composite Structure Diagram	
		ityParameterNode	Pattern [additional_stereotypes] Refine [StandardProfile]	Content Diagram	
	Activi	ityPartition	Refine [SysML]	CORBA IDL Diagram Dependency Matrix	
		tructuralFeatureValueAction	ReplaceStereotype [MagicDraw Profile]	Deployment Diagram	
	AddV	ariableValueAction	ReplaceTaggedValue [MagicDraw Profile	Derive Requirement Matrix	
		eceiveEvent	ReplaceType [MagicDraw Profile] RequirementRelated [SysML]	Free Form Diagram	
	Artifa Assoc		Satisfy [SysML]	Generic Table Glossary Table	
		ciationClass	TODO_Owner [MagicDraw Profile]	Instance Map	
	Behav	viorExecutionSpecification	Trace [StandardProfile]	Instance Table	
		dcastSignalAction	Trace [SysML] typeModifier [MagicDraw Profile]	Interaction Overview Diagram	
	CalBe	ehaviorAction	Verify [SysML]	Metric Table Networking Diagram	
		perationAction	virtual [MagicDraw Profile]	Object Diagram

6. Select the column Source from the CSV file and the property source from the Properties list, and then click

Add

Add

to map them.

7. Select the column Target from the CSV file and associate it with the property target by clicking

8. Click

. The figure below shows the newly imported trace relationships.
