2021x Refresh2 Version News

Magic Alf Analyst

Released on: December 3, 2021

Magic Alf Analyst Version 2021x Refresh2 has fixed a number of bugs.

Key Issues Fixed

The following key issues have been fixed with Magic Alf Analyst 2021x Refresh2:

- A Java ClassCastException is no longer thrown when a void value is passed to certain Alf library functions.
- FunctionBehaviors with Alf bodies are now properly included during a project build.
- Dependencies on context properties, operations, or signals referenced without using the *this* syntax have been properly recorded.

You can check the list of publicly available issues or your own reported issues fixed in Magic Alf Analyst 2021x Refresh2.
