

MOF support

MagicDraw allows export to/import from UML models from/to MOF (both CMOF and EMOF) XMI files. MOF 2.0 and 2.4 (MOF 2.4.1 to be more specific) are supported.

For more information about the MOF domain model, see **Meta Object Facility (MOF) Core Specification** for [MOF 2.0](#) or [MOF 2.4.1](#).
