Disabling inbound network activity

Note that after disabling inbound network activity, you will not be able to open the modeling tool Help or submit an issue.

Quudisable information underwork activity, double-clicking a project file (.mdzip) opens the project in a new modeling tool window.

To disable inbound network activity

- 1. Go to < modeling tool installation directory>\bin and open the properties file, e.g., magicdraw.properties.
- 2. In the JAVA_ARGS line, add the following argument:

-DDISABLEINBOUNDCON=true

3. Save and close the file.
