\$pageprop is a helper tool for setting the page layout of a DOCX file.

\$pageprop.setLandscape()

Add a Section Break (Next Page) on the next page and set the layout orientation of the following pages to Landscape.

\$pageprop.setLandscape(Double:top, Double:bottom, Double:left, Double:right)

Add a Section Break (Next Page) on the next page and set the layout orientation of the following pages to Landscape. Set the page margin with Double values.

	Name	Type	Description
Parameter(s)	top	java.lang.Double	Top page margin
	bottom	java.lang.Double	Bottom page margin
	left	java.lang.Double	Left page margin
	right	java.lang.Double	Right page margin
Return	-	void	-

\$pageprop.setLandscape(String:top, String:bottom, String:left, String:right)

Add a Section Break (Next Page) on the next page and set the layout orientation of the following pages to Landscape. Set the page margin with String values.

	Name	Type	Description
Parameter(s)	top	java.lang.String	Top page margin
	bottom	java.lang.String	Bottom page margin
	left	java.lang.String	Left page margin
	right	java.lang.String	Right page margin
Return	-	void	-

\$pageprop.setPortrait()

Add a Section Break (Next Page) on the next page and set the layout orientation of the following pages to Portrait.

\$pageprop.setPortrait(Double:top, Double:bottom, Double:left, Double:right)

Add a Section Break (Next Page) on the next page and set the layout orientation of the following pages to Portrait. Set the page margin with Double values.

	Name	Type	Description
Parameter(s)	top	java.lang.Double	Top page margin
	bottom	java.lang.Double	Bottom page margin
	left	java.lang.Double	Left page margin
	right	java.lang.Double	Right page margin

Return	-	void	-
--------	---	------	---

\$pageprop.setPortrait(String:top, String:bottom, String:left, String:right)

Add a Section Break (Next Page) on the next page and set the layout orientation of the following pages to Portrait. Set the page margin with String values.

	Name	Type	Description
Parameter(s)	top	java.lang.String	Top page margin
	bottom	java.lang.String	Bottom page margin
	left	java.lang.String	Left page margin
	right	java.lang.String	Right page margin
Return	-	void	-
