

Favorites

You can mark any element as a favorite, including diagrams, types, packages, etc., that you regularly use in your model and need to access quickly.

Using favorites saves time, as you are able to:

- Navigate quickly to any desired place in your model.
- Easily narrow the search scope to get rid of unneeded elements and thus find desired elements faster.
- Easily narrow the scope for model analysis.

In a server project, each user has his own list of favorites.
