

# Smart package properties

Every smart package has several properties that allow you to specify the contents of the smart package. These properties are described in the following table.

Property	Description
<b>Query</b>	Stores a set of criteria for automatic inclusion of elements into the contents of the smart package.  For more information, see <a href="#">Including elements into a smart package automatically</a> .
<b>Additional Elements</b>	Stores the list of the elements manually included into the contents of the smart package.  For more information, see <a href="#">Including elements into a smart package manually</a> .
<b>Excluded Elements</b>	Stores the list of the elements excluded from the contents of the smart package.  For more information, see <a href="#">Removing elements from a smart package</a> .
