

Creating equivalent classes

To create equivalent classes

1. Click  **Equivalent Class** on the Concept Modeling diagram palette.
2. In the diagram pane, click on a class and drag the line to another class to make them equivalent to each other. A double-headed arrow will be created between the two classes, and the stereotype **«Equivalent Class»** will be visible.

Creating class equivalence between two classes.

The classes "US President" and "Principal Resident of White House" are equivalent to each other.
