

COR2007

Abbreviation

COR2007

Message

Exchange from and/or to elements do not match Swimlane representation

Description

Requirements for validation rule for detecting exchanges violating Swimlane representatives in activity diagrams. The representation of the Swimlane of the operational activity and the performing node should match.

Severity

Warning

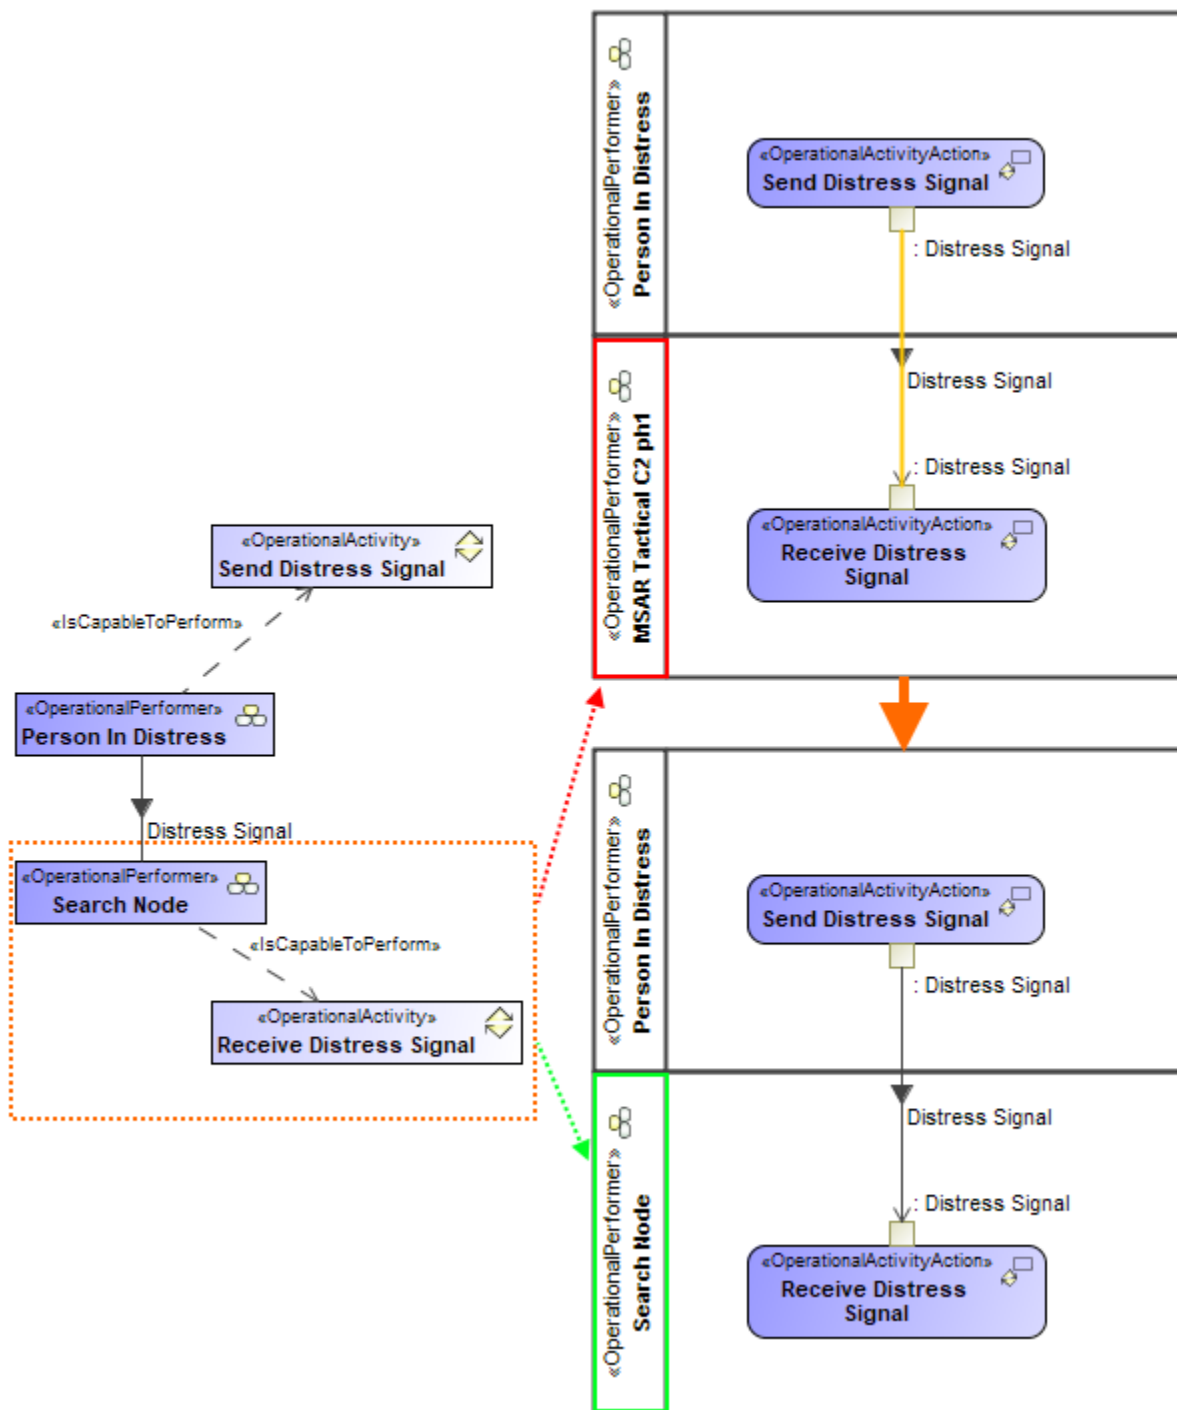

Context element

Activity Edge

Solvers

- **Remove Realization of the Operational Exchange** - removes the realization of the Operational Exchange.
- **Remove Operational Activity Action[s] from the Swimlanes** - removes the Operational Activity Action from the Swimlane.

Example

Swimlane representation is changed to Search Node according to the structural model
