

# Using drag and drop

Create relationships or assign property values by dragging and dropping one element onto another right in the diagram pane.

## Before

## After

There are a number of predefined rules to create relationships or assign property values automatically. You may also set up your own drag-and-drop specifications between any elements.

To select a rule

1. Do one of the following:
  - Drag a selected element onto another, hold it for a few seconds and then release it. A shortcut menu is displayed.
  - Right-click an element and drag it onto another (This action is valid only for Windows operating system users). A shortcut menu is displayed.
2. From the shortcut menu, select one of the rules you want to apply.

The following table lists the predefined drag and drop rules. These rules define the possible results when dragging source element on the target element.

| Source Element | Target Element | Created Relationship | Assigned Property |
|----------------|----------------|----------------------|-------------------|
|----------------|----------------|----------------------|-------------------|

|   |  |                              |  |
|---|--|------------------------------|--|
| Actual Post   | Actual Enduring Task   | Achieved Effect              |  |
| Actual Organization   | Actual Enterprise Phase  |                              |  |
| Actual Person   | Actual Project   |                              |  |
| Fielded Capability  | Actual Property Set<br>Actual Project Milestone<br>Actual Post<br>Actual Location<br>Actual Organization<br>Actual Person<br>Fielded Capability<br>Actual Measurement<br>Actual Project Milestone Role |                              |  |
| Activity  | Capability   | Maps To Capability           |  |
| Actual Post   | Actual Post  | Actual Resource Relationship |  |
| Actual Organization   | Actual Organization  |                              |  |
| Actual Person   | Actual Person  |                              |  |
| Actual Post   | Competence   | Provides Competence          |  |
| Actual Organization   |  |                              |  |
| Actual Person   |  |                              |  |
| Actual Organization   | Actual Project   | Responsible For              |  |
| Actual Post   |  |                              |  |
| Actual Person   | Actual Post  | Fills Post                   |  |
