

CV-6 Capability to Operational Activities Mapping

Description

The CV-6 describes the mapping between the capabilities required and the activities that enable those capabilities.

It is important to ensure that the operational activity matches the required capability. The CV-6 DoDAF-described Model provides a bridge between capability analyzed using CVs and operational activities analyzed using OVs. Specifically, it identifies how operational activities can be performed using various available capability elements. It is similar in function to the SV-5a Operational Activity to Systems Function Traceability Matrix. The capability to activity mappings may include both situations where activities fully satisfy the desired capability and those where the activity only partially meets the capability requirement.

The intended usage of the CV-6 includes:

- Tracing capability requirements to operational activities.
- Capability audit.

Implementation

CV-6 can be represented using a CV-6 diagram which is an editable Dependency Matrix. The Capabilities are used as row elements and the Operational Activities are used as column elements.

Criteria

Select Row Scope: CV-2 ... Select Column Scope: OV-5 ...

	Coordinate Other Agencies(context Land SAR)	Find Victim	Firefight	Investigate Reports Of MissingPersons(context Land SAR)	Monitor Health	Process Warning Order	Provide continuous radar surveillance(context Maritime SAR)	Provide emergency towing cover in high risk shipping area...	Provide Medical Assistance	Receive Distress Signal	Recover Victim	Rescue	Search	Search & Rescue(: Medical Condition, : Updated Location)	Send Distress Signal	Send Warning Order	Solve incident involving chemicals	Solve incidents in all areas of inhospitable terrain(context ...	Transit To SAR Operation	Transport Patient	Treat Patient(context Land SAR)

This model is analogous to the SV-5a Operational Activity to System Function Traceability Matrix – but provides the interface between Capability and Operational Models rather than Operational to System Models.
