Installation on Linux using scripts

Scripts

- TWC_2021xRefresh2-HF5_install_scripts.zip

This section covers the installation and configuration of Teamwork Cloud on Linux, deployed on a single server. It also provides the configuration for installing the Teamwork Cloud node as well as the underlying Cassandra node on the same server.

> ⓧ Cassandra 3 will reach its end of life in 2023. Teamwork Cloud 2021x Refresh 2 Hot Fix 5 works with both Cassandra 3 and 4. Upgrades and new deployments should install Cassandra 4. Cassandra 3 should only be installed for data migration or recovery.
> ⚠ **Prerequisites**
> Before installing Teamwork Cloud, do the following:

To install and configure a working instance of Teamwork Cloud
- Make sure that your hardware and software meet the recommended system requirements and prepare the operating system for installation.
- Download and extract the *TWC_2021xRefresh2-HF5_install_scripts.zip* file. It contains the scripts you will need for the installation.

1. Download and extract the *TWC_2021xRefresh2-HF5_install_scripts.zip* file if you haven't already done so.
2. Install the FlexNet license server.
3. Install Apache Cassandra:
   - Cassandra 4 (recommended)
   - Cassandra 3 (EOL 2023)
4. Install Teamwork Cloud services.

Teamwork Cloud installation and configuration on Centos 7.x on a single server.
