

Installation

To install Report Wizard Template Editor in Microsoft Word

1. Copy all files and subdirectories from the `<install.dir>\plugins\com.nomagic.magicdraw.reportwizard\vba` folder to `%APPDATA%\Microsoft\Word\STARTUP` (`%APPDATA%` is the location where user data is stored). For example,
 - On Windows 2000 and Windows XP: `C:\Documents and Settings\User Name\Application Data\Microsoft\Word\STARTUP`
 - On Windows Vista: `C:\Users\UserName\AppData\Roaming\Microsoft\Word\STARTUP`
 - On Windows 7, 8, and later: `C:\Users\UserName\AppData\Roaming\Microsoft\Word\STARTUP`
2. Restart Microsoft Word.

Microsoft Word 64bit may require `mscomctl.ocx` for this add-in. To install `mscomctl.ocx`:

1. Go to <https://www.microsoft.com/en-au/download/details.aspx?id=10019>
2. Download Microsoft Visual Basic 6.0 Common Controls
3. Install `mscomctl.ocx` by extracting `VisualBasic6-?????.exe` and then copy `mscomctl.ocx` to `C:\Windows\System32` or `C:\Windows\SysWOW64`
