

Requirements validation rules

This page contains all constraints for the Requirements implemented in the tool as validation rules.

The Requirements validation suites and active validation suites include the following validation rules:

- [Invalid Copy of requirement](#)
- [Invalid return parameter type](#)
- [Invalid Slave Requirement text](#)
- [Invalid stereotype\(s\) of client/supplier of Copy](#)
- [Missing Recursive copy of sub-requirement](#)
- [Recursive loop of Copy dependencies](#)
- [Invalid source or target of DeriveReq](#)
- [Invalid generalization of Requirement](#)
- [Invalid owned attribute of Requirement](#)
- [Invalid owned operation of Requirement](#)
- [Missing requirement stereotype](#)
- [Suspect Unlinked Requirement](#)
