

# Displaying and navigating through changes

You can customize the content of the **Merged Result** tree/list as well as navigate through changes in both the **Merged Results** tree/list and the **Specification** panel using the toolbar that is located at the top of the **Merge** window.

The toolbar buttons for customizing the **Merged Results** tree/list and navigating through changes are described in the following tables.

Button / Shortcut keys	Tooltip text	Description
	Accept the selected change and go to the next change	Click to accept the selected element change and go to the next change (might be a property or the element).
	Accept the selected change, its property changes and go to next change	Click to accept the selected element change together with the element property changes and go to the next changed element.
	Accept the selected change, its property changes, all subelement changes and go to next change	Click to accept all changes from both contributors starting from the selected element and go to the next changed element (which is not a subelement). For example, if the root package <i>Model</i> is selected, then all changes for the whole project will be accepted.
	Reject the selected change and go to the next change	Click to reject the selected element change and go to the next change (might be a property or the element).
	Reject the selected change, its property changes and go to next change	Click to reject the selected element change together with the element property changes and go to the next changed element.
	Reject the selected change, its property changes, all subelement changes and go to next change	Click to reject all changes from both contributors starting from the selected element and go to the next changed element (which is not a subelement). For example, if the root package <i>Model</i> is selected, then all changes for the whole project will be rejected.
 Alt + Home	Go To First Change	Click to select the first change.  The button is not available if the first change is already selected.
 Alt + Up arrow	Go To Previous Change	Click to select the previous change.
 Alt + Down arrow	Go To Next Change	Click to select the next change.
 Alt + End	Go To Last Change	Click to select the last change. The button is not available if the last change is already selected.
 Alt + Page Down	Go To Next Conflict	Click to select the next conflict. The button is not available if there are no conflicts.
	Annotate Merged Diagram	Click to turn on showing merged diagram annotations.
	Report	Click to generate a Project Merge differences report in Microsoft Word format.
<b>Options menu</b>		
Icon	Option	Description
	Filter	Click to open the <b>Select Element Type</b> dialog. Clear the checkbox next to an element that you want to hide in the <b>Merged Result</b> tree/list.
