Adding or removing element types

To add or remove element types

1. In the **Criteria** area, click the ubutton next to the **Element Type** box. The **Select Element Type** dialog with the element and stereotype list opens.

		Select Element Type
Element Type:	Drag elements from the Model Browser	
Criteria		

- 2. Do one of the following:
- To add the element types, select the appropriate check boxes in the list.

Properties corresponding to the selected types will be added to the list of available columns.

- To remove the element types, click to clear the appropriate check boxes in the list.
 - Properties corresponding to the deselected types will be removed from the list of available columns.

Select Element Type					
Show or hide elements The element type filter allows for choosing element types that should be displayed. Click the List, Inheritance, or Structural button to change the arrangement of model element types. Press Shift and click to select recursively.					
Q Type here to filter types

Include Subtypes () Include Custom Types () Select All Clear All					
OK Cancel Help					

• Select the Include subtypes check box to display the subtypes of the selected element types.

• Select the Include Custom Types check box to display the custom types extending the selected element types.

To add an element type, you can also drag a selected element to the Element Type box directly from the Model Browser.

- To select *adjacent* elements, select a single element and hold down the Shift key while you click other elements.
- To select nonadjacent elements, select a single element and hold down the Ctrl key while you click other elements.

The new value of the **Element Type** box replaces the old value.
