- [Removing the portionMarking representation attribute value](#)

The portionMarking representation attribute is an abbreviation of the full Data Marking text, and is displayed on an element as a prefix once the Data Marking is added to an element.

## Important

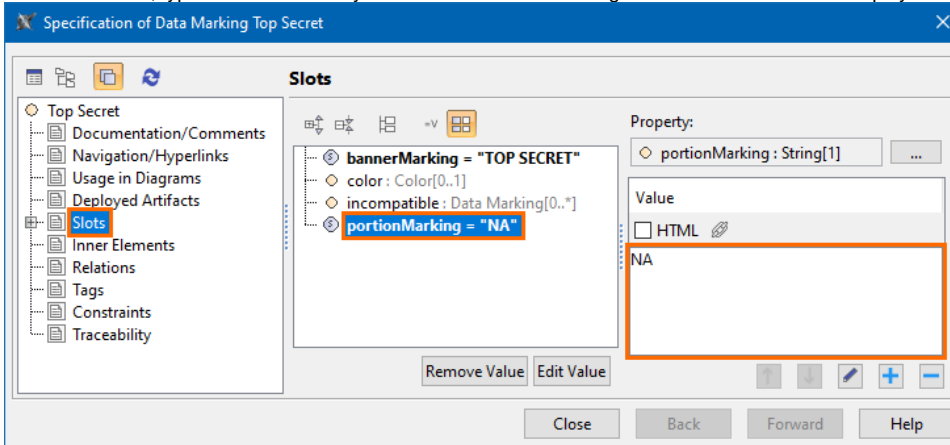

If you make changes to the portionMarking representation attribute, make sure to refresh the diagram (click F5 on the keyboard or click **View > Refresh** in the tool) to see the changes on the element portion markings.

## Specifying the portionMarking representation attribute

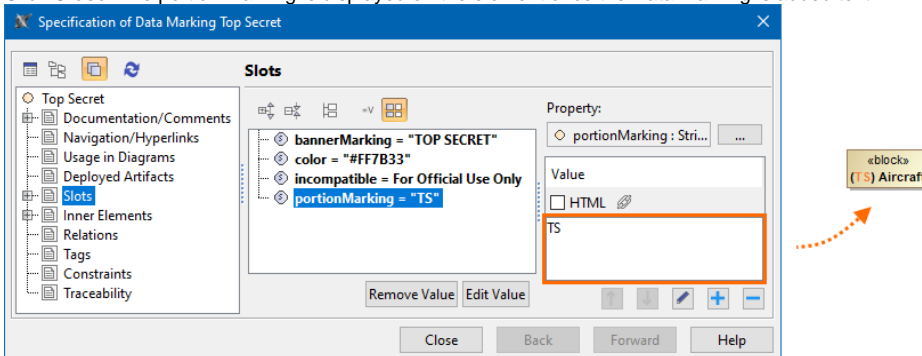

To specify the portionMarking representation attribute

### • Through the Data Marking element:

1. Right-click the Data Marking element and open its **Specification window**.
2. In the property group list, select **Slots > portionMarking**.
3. In the **Value** box, type the abbreviation you want for the Data Marking. The abbreviation will be displayed on the elements.

4. Click **Close**. The portion marking is displayed on the element once the Data Marking is added to it.

### • Through the Data Marking Category element:

1. Right-click the Data Marking Category element and open its **Specification window**.
2. In the property group list, expand **Data Markings**. Data Marking elements that belong to the category appear.
3. Expand the Data Marking element you want to edit and select **Slots > portionMarking**.

4. In the **Value** box, type the abbreviation you want for the Data Marking. This abbreviation will be displayed on the elements.

5. Type the abbreviation you want for the Data Marking. This abbreviation will be displayed on the elements.
6. Click **Close**.
